

CNC Lathe Machinist

Job Overview and Details

Location: 75 Bathurst Drive, Waterloo, ON N2V 1N2.

Shift: Day 0630 to 1530

Salary: \$30.00 to \$40.00 hourly (depending on experience)

Employment: Full-time, permanent position 42 hours per week and potential overtime.

Start Date: Immediate start or as soon as possible

Benefits: Health benefits, financial benefits, and additional perks provided.

Job Summary

We are currently looking to hire a highly skilled and experienced CNC Lathe Machinist to join our team immediately or as soon as possible. In this role, you will be responsible for setting up, operating, and maintaining CNC Lathe machines to produce custom, high-precision parts with the focus on custom, one-off, and low-volume components.

The ideal candidate will have extensive machining experience, excellent English communication skills, strong attention to detail, and the ability to work independently with minimal supervision. You will collaborate with programmers and other team members to ensure parts are completed to exact specifications while meeting quality and delivery expectations.

Responsibilities

- Read and interpret engineering drawings, blueprints, charts, and work instructions
- Set up, operate, and adjust CNC and conventional machines and tooling
- Measure and lay out workpieces, calculating dimensions and tolerances as required
- Inspect parts using precision measuring tools (e.g., micrometers, calipers) to verify accuracy and conformance to specifications
- Maintain accurate inspection records and complete detailed reports
- Document and communicate any deviations from specifications or tolerances

- Ensure all machined components meet quality standards and production requirements

Qualifications

- Proven experience as a CNC Lathe Machinist for 5 or more years.
- Machinist Trade Certification, Machinist Red Seal Endorsement, Tool and Die Maker Trade Certification, or equivalent qualifications.
- Proficiency in operating CNC machinery, such as HAAS, Fanuc and Kitamura controls.
- Ability to read and interpret technical documents, and blueprints.
- Strong attention to detail with excellent problem-solving skills.

Join our team and contribute your expertise as we strive for excellence in our manufacturing processes!
